DETAILED ACTION

Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-6, drawn to a device comprising a first standard point member, a second standard point member, a third standard point member, assistant point members, and a first straight line and a second straight line, classified in class 356, subclass 601.
 - II. Claims 7-19, drawn to a device comprising a first bar and a second bar, at least three standard point members are fixed on the first and second bars, non reflecting member are respectively attachable to and removable from the at least three standard points , classified in class 702, subclass 158.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I (claims 7-19) and II (claims 1-6) are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because claim 7 does not recite the details of the claim 1. The subcombination has

separate utility such as spectrographic, spectrophotometer, spectrometer, and optical photometers.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

6. A telephone call was made to Mr. Bruce H. Bernstein on 02/19/03 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any

Art Unit: 2877

amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sang Nguyen whose telephone number is (703) 308-6426.
